

WARNING

The replacement of this battery kit in a Kannad ELT is subject to the following conditions:

- **The installer must be equipped with the proper test equipment**
 - ELT tester, micro-ammeter
 - PR600 programming kit for Compact and Integra ELTs
 - Other GSE listed in the relevant CMM.
- **The installer must comply with the CMM instructions and perform full “Testing and Fault Isolation” as described in the relevant CMM, including but not limited to**
 - Power and frequencies measurements
 - Current measurements
- **The battery replacement must be done under a Part 145, FAR 145, or equivalent certification agreement according to local regulations.**
- **The installer must issue a release document such a EASA Form 1, FAA Form 8130 or equivalent release document according to the local regulation**

Failure to comply with these requirements may lead to the ELT not functioning as designed.

For more information, refer to the relevant Level 2 CMM and to the Service Letter S18XX50X-25-02 “Maintenance Policy for all Kannad ELTs” available on www.kannadaviation.com
