Standard Features with an Airmark Engine Overhaul

- | | |
|---|--|
| * Crankshaft is dynamically balanced to less than .25 inch ounces to eliminate rotational imbalance and excess vibration (100% improvement over OEM tolerance standard) | * Manufacturers required 100% parts replacement (OUR minimum standard) |
| * Connecting rods are balanced for total weight and equal mass distribution | * All parts are cleaned by chemical and/or mechanical means |
| * Cylinder valves and seats are precision ground to maximize cylinder performance | * Detailed inspection of all parts: Visual and Dimensional |
| * Hydraulic lifter bleed down rates matched | * Steel parts are Magnetic Particle Inspected |
| * Ultra-Sonic Inspection of the crankshaft for subsurface flaws (TCM only) | * Non-Ferrous parts are Liquid Penetrant Inspected |
| * All Airworthiness Directives and Mandatory Service Bulletins are complied with | * Alodine corrosion treatment on most aluminum parts |
| | * Painted with a custom high temperature enamel finish |
| | * Complete traceability of all parts installed |
| | * Fully tested in our diagnostically equipped test cell |

Warranted for 1 year or 480 hours at 100% and a limited pro-rated warranty will continue to 2 years or TBO, whichever occurs first from the date of overhaul. Accessories are 6 months or 240 hours

Core Deposit:

Quoted by:

Overhaul price is contingent upon your engine core crankcase & crankshaft being repairable
 Engine must be a complete and normal core.

All pricing is subject to change without notice. Core charges may apply. Freight is additional.
